

Please add the following new claims:

Sub
C1

1 3. A graphical interactive method for permitting a computer system to access a web site,
2 the method comprising the steps of:
3 displaying a desktop icon, said desktop icon associated with an address of the web
4 site;
5 launching a browser application in response to a user of said computer system
6 selecting said desktop icon for execution; and
7 accessing the web site using said browser application and said address of the web
8 site.

A'

1 4. A graphical interactive method for permitting a computer system to access a web site,
2 said method comprising the steps of:
3 displaying a desktop icon, said desktop icon associated with a file containing
4 information relating to the web site; and
5 accessing the web site using an already executing browser application and said
6 address of the web, in response to a user of said computer system selecting said desktop icon
7 for execution, wherein said browser application is separate from said file.

1 5. A graphical interactive computer system for accessing a desired document located at a
2 network location, comprising:

3 means for displaying a desktop icon associated with a file containing a network
4 address corresponding to the network location;

5 means for enabling a user of the computer system to interactively select said desktop
6 icon for execution;

7 means for launching a browser application in response to the user selecting said
8 desktop icon for execution, if said browser application is not currently executing, wherein
9 said browser application is separate from said file; and

10 means for retrieving the desired document from the network location using said
11 browser application and said network address.

A'
1 6. A graphical interactive method for permitting a first computer system to access a web
2 site, said method comprising the steps of:

3 receiving a desktop icon associated with a file from a second computer system, said
4 file containing an address corresponding to the web site;

5 displaying the desktop icon on the first computer system;

6 launching a browser application in response to a user of the first computer system
7 selecting said desktop icon for execution; and

8 accessing the web site using said browser application and said address corresponding
9 to the web site.

1 7. The method of claim 6, wherein said receiving step comprises receiving an e-mail
2 from the second computer system, said e-mail including said desktop icon.
